Kumar,

I've had a quick rummage on Google on Bihar roads and there seems to be quite a lot of stuff by Government, international agencies and consultants (see attached and below for examples). Maybe you should try and find out from locals (academics, officials, etc) if there has been any project/ programme evaluation work done, particularly with an economic bias – employment generation, productivity measurement, capital/ labour technology options, etc. It may all have been done already.
